

BioFire® FilmArray® Respiratory Panel (RP) EZ – CLIA-Waived

Assay	Potential CPT Code	Medicare 2018 National Limit
Adenovirus Coronavirus Human Metapneumovirus Human Rhinovirus/Enterovirus Influenza A Influenza A/H1 Influenza A/H1-2009 Influenza A/H3 Influenza B Parainfluenza Virus Respiratory Syncytial Virus <i>Bordetella pertussis</i> <i>Chlamydophila pneumoniae</i> ** <i>Mycoplasma pneumoniae</i>	87633-QW*	\$514.55

CPT CODE DEFINITIONS

87633-QW* The new waived complexity code 87633QW [Infectious agent detection by nucleic acid (DNA or RNA); respiratory virus (eg, adenovirus, influenza virus, coronavirus, metapneumovirus, parainfluenza virus, respiratory syncytial virus, rhinovirus), multiplex reverse transcription and amplified probe technique, multiple types or subtypes, 12-25 targets] was assigned for the testing performed by BioFire Diagnostics, FilmArray 2.0 EZ Configuration Instrument (Viral and Bacterial Nucleic Acids){Nasopharyngeal Swabs}.

*QW Modifier: CLIA-waived test
**Also known as *Chlamydia pneumoniae*

The information provided is gathered from public sources and is provided here for illustrative purposes only. This information cannot cover all situations or all third-party payors' rules or policies, nor can use of the information guarantee coverage or payment. This document makes no representations or warranties as to selecting codes for procedures or compliance with any other billing protocols or prerequisites. As with all claims, individual hospitals and physicians are responsible for exercising independent clinical judgment in selecting the codes that most accurately reflect a patient's condition and the procedures performed. Laws, regulations, and policies concerning coding and payment are complex and subject to change. Physicians and hospitals should refer to current, complete, and authoritative publications, such as American Medical Association (AMA) CPT lists, Medicare transmittals, and third-party payor policies as the basis for selecting codes that describe care rendered to an individual patient, and may wish to contact individual Medicare contractors or other third-party insurers as needed. The AMA's CPT Assistant (December 2007) advises that if assays provide separate results, then multiple units would be appropriate to report. The 2018 Medicare national limit amounts listed are for example purposes only as rates can vary by factors such as geography. CPT is a registered trademark of the American Medical Association (AMA).
